

# AIRSHIP PIRATES CORE

## RULEBOOK ERRATA

Version 1.2, September 2011

*Special thanks to John Kahane!*

**P.44** The Air Navy Officer skill list should include Pilot.

**P.49** The Pirate/Privateer skill list should include Pilot.

**P.54**

Under "Cash and Equipment", the reference to Cultures should be to p.28, not p.172.

**P.54** Under "Airship Skills", the list should also include Pilot skill.

**P.55**

In the second column, under "Theater", the bit in brackets after Disguise, "(costumes, stage set, etc.)" should be replaced with "Performance (any)".

**P.56**

In the first column, Airship Complications are said to be on p.X. They are actually on pp.126-7.

**P.72**

Thomas has the Fast Reload Talent, which doesn't exist. Replace it with Quick Draw.

**P.76**

Morris Higson's Class box is empty. It should read "Lower Class."

**P.95**

Performance is a Group Skill, though it is not marked as such.

**P.107**

There should be another paragraph at the end of the Recovery section (just before the "Automaton Healing" heading) as follows:

"Bruise damage heals much more quickly than normal damage. Natural healing takes place at a rate of 1 health point plus 1 for every Fortitude point over 0 for every hour of rest. With medical

attention, each success on a Wits + Medicine roll heals 2 points of damage."

**P.127**

At the top of the second column, the beginning of the sentence has gone missing. It should read: "The following rules explain how crews are handled in..."

**P.131**

The reference to the Bestiary on the second line should read "p.261".

**P.133**

In the example in the first column, under the second table, medium range is 3, not 2, so the example should read:

*Example:* Two cars chasing each other at medium range would be 3x10 yards apart, i.e. 30 yards; whereas two airships chasing each other at medium range would be 3x100 yards apart, i.e. 300 yards. This gives the players some indication as to whether their opponent is within range of their guns.

**P.153**

Under the entry for the Steam Truck, the text "(coal or wood)" should be under the Range heading.

**P.170**

The last sentence in the first column should refer to the *Neovictorian* city of Desolation – the Neobedouin don't build cities!

**P.253**

In the second column, near the bottom, of Example 2, it states the Professor has "6x3=12 black dice". This should, of course, be 18 black dice.
